Odometer change slowly after 6 years

Types — Sedan — SUV

Change left side options to find more

- Different types of cars have different price change patterns.
- US and JP cars have higher market share.
- For sellers, I recommend not to sell your car when it is pretty new since it loses a lot of value in a short time.
- For buyers, I recommend to buy cars which are around 5 years because the price won't change a lot after 5 years.
